Rural Minds (ruralminds.org) Online mental health information, webinars, and crisis referrals for people in rural America.

What to do if someone is at risk

If you think someone is thinking about suicide, assume you are the only one who will reach out. Here's how to talk to have an honest conversation with someone who may be struggling with their mental health:

- Talk to them in private
- Listen to their story
- Tell them you care about them
- Ask directly if they are thinking about suicide and if they say they are, take them seriously
- Encourage them to seek treatment or contact their doctor or therapist
- Help them call one of the resources on this sheet
- Avoid debating the value of life, minimizing their problems or giving advice

1. Express Concern: Let the person know that you are concerned, in a kind and supportive way.

2. Normalize: Normalize mental health issues to help the individual understand that they are not alone, and to help address potential stigma or self-limiting beliefs.

3. Activate: Activate the individual's support network and communicate your commitment to supporting the individual through the process of accessing resources.

4. Refer: Refer the individual to reputable resources and let them know there is help available.
